

To Whom It May Concern:

Thank you for your interest in becoming a patient at our practice. Dr. Paunesky takes an interest in all of her patients to ensure you receive the best care. Please be advised if you have breast, ovarian, or uterine cancer or a medical issue related to, we will need a letter from your oncologist or your treating physician stating it is not a medical risk to your health to begin natural hormone replacement therapy.

If you have or can obtain a copy of your last mammogram report and/or your last transvaginal ultrasound report, please mail the results to our office along with your medical history packet prior to your initial consult. This would be a helpful part of your initial consult with Dr. Paunesky.

We look forward to assisting you in achieving your optimal peak of health...

Sincerely,

The Staff at Renaissance Medical Center
